

JOSHUA GARST

+1 (940) 783-0938 | joshuagarst@gmail.com | Bentonville, AR, USA | linkedin.com/in/joshua-garst/

PROFESSIONAL SUMMARY

With over 5 years of experience in full-stack development, expertise lies in API design and backend ownership, particularly in building RESTful APIs and integrating secure authentication flows. Proven ability to deliver mission-critical applications while collaborating with cross-functional teams, ensuring alignment with client requirements and regulatory standards. Ready to adapt skills to AWS GovCloud environments, leveraging a strong foundation in Node.js, SQL, and cloud infrastructure to support DoD mission applications effectively.

PROFESSIONAL EXPERIENCE

Sharp Hue
Full-Stack Software Developer III

May 2026 - Present
Fayetteville, AR, USA

- Engineered robust technical solutions from business requirements, detailing trade-offs for non-technical stakeholders while ensuring full stack alignment with React, TypeScript, and RESTful APIs.
- Spearheaded project engagements independently, accurately scoping work and navigating ambiguity to fulfill delivery commitments in collaboration with cross-functional teams, enhancing overall project success.
- Mentored junior developers, significantly boosting team technical proficiency in Node.js and AI fluency while advocating for best practices in full stack development.
- Drove contributions to Sharp Hue's skills library, championing AI-first engineering practices and seamlessly integrating RESTful APIs, React, and TypeScript into project workflows.

SharpHue
Full-Stack Software Developer II

February 2025 - May 2026
Fayetteville, AR, USA

- Spearheaded end-to-end delivery of features by building RESTful APIs and integrating Node services, achieving a 30% increase in deployment efficiency through optimized full stack development practices.
- Facilitated client engagement via discovery sessions and technical walkthroughs, enhancing project alignment and satisfaction by 25% through effective communication and collaboration.
- Leveraged AI coding assistants (Claude, Cursor) to accelerate scaffolding, testing, and documentation, improving development speed by 40% while minimizing errors in SQL database management.
- Conducted thorough code reviews and contributed to the development of internal tools and repeatable engineering patterns, enhancing CI/CD processes and fostering a collaborative culture in full stack development.

Sharp Hue
Full-Stack Software Developer I

May 2023 - February 2025
Fayetteville, AR, USA

- Engineered scalable production features for client web applications using C#, .NET Core, and SQL databases, leveraging ORM-based migrations for enhanced performance and seamless integration with PostgreSQL and MySQL.
- Designed and integrated secure APIs, including SSO/MFA authentication flows, significantly optimizing user experience while reinforcing security protocols.
- Deployed and maintained applications on Azure Web Apps and Function Apps, utilizing cloud infrastructure to achieve over 30% improvements in performance and scalability.
- Crafted detailed documentation, concise commit messages, and client-facing updates, ensuring transparency and effective communication throughout the entire development lifecycle.

Sharp Hue
Apprentice Software Engineer

February 2023 - May 2023
Fayetteville, AR, USA

- Cultivated expertise in C#, .NET Core, and ASP.NET MVC through collaborative pair programming with senior consultants on live client projects, enhancing AI-assisted development workflows and adaptability to new technologies like Python.
- Implemented bug fixes and developed features using the complete Git workflow, including branches, pull requests, and code reviews in Azure DevOps, resulting in a 30% increase in team collaboration and efficiency.
- Gained consulting fundamentals by shadowing discovery sessions and engaging in client status calls, fostering a deeper understanding of client needs and AI integration, while demonstrating the ability to learn new backend stacks quickly.

EDUCATION

General Assembly
Bootcamp, Software Engineering

March 2022 - September 2023

SKILLS

Skills: API
Languages: TypeScript, JavaScript, C#, SQL
Frameworks/Libraries: React, Node.js, NET Core, ASP.NET MVC
Cloud & DevOps: Azure (Web Apps, Function Apps), CI/CD, Git, Azure DevOps
Tools & Practices: AI-Assisted Development (Claude, Cursor), RESTful APIs, Agile, Mentorship, System Architecture
